

HEWER

OIL SERVICES COMPANY

Company Profile 2026

Integrated oil & gas services — from the well to the refinery.

hewer.iq

One partner from the well to the refinery

With roots going back to 2008 and established as a group in 2020, HEWER unites five specialized companies into a single, ISO-certified group — integrated oilfield and refinery services, pressure-control engineering and industrial investment — serving clients across the Kurdistan Region and Federal Iraq.

24/7 operational support

Iraq's integrated energy services partner

HEWER Oil Services Company is a leading Iraqi integrated energy services provider supporting major operating companies with comprehensive upstream solutions. Our services span drilling, well intervention, testing, production and early field development.

Through our specialized group companies we deliver reliable, efficient and internationally compliant services backed by strong regional experience. Every project is delivered safely, with a clear focus on value, field performance and the long-term objectives of Iraq's oil and gas sector.

Faster turnarounds Advanced technology accelerates drilling and workover without compromising safety.

Smaller footprint Best practice resource use reduces environmental impact year on year.

Global reach, local roots Strategic partnership with Optimum (UK) and deep Iraqi field experience.

Leading with innovation and excellence

Since our founding in 2020, our mission has been to lead with innovation and excellence in the oil and gas industry. We combine advanced technology with sustainable practices to provide superior energy solutions that anticipate the needs of a dynamic global market.

Our partnerships and ISO certifications underline our commitment to the highest standards of quality and safety. At HEWER, we are driven by a passion to make a meaningful impact and to be the partner of choice in energy — offering reliable, efficient services that empower our clients.

Thank you for trusting us to help drive your success. We look forward to achieving remarkable results together.

Abdullah Khoshnaw

Founder, HEWER Oil Services Company

WHAT DRIVES US

Innovation-led delivery

Sustainable practices

Uncompromised safety

Partner of choice

Built to be Iraq's most trusted energy partner

Vision

To become Iraq's most trusted integrated energy partner — the first call for operators who need safe, reliable upstream delivery.

Mission

Deliver superior drilling, testing, well services and production support through specialized companies, world-class partners and international standards.

Values

- ✓ Safety
- ✓ Integrity
- ✓ Technical Excellence
- ✓ Innovation
- ✓ Customer Focus
- ✓ Local Development

"Efficiency meets reliability in every service we provide."

Our expertise and experience have made HEWER a trusted partner for operators throughout Iraq — with safety, reliability and continual improvement at the core of every project.

Five companies, one integrated group

HEWER

Oil Services Company · Parent

Optimum Drilling Services

Independent MENA oilfield services company (BVI) — drilling, workover, completion, testing and project management.

Integrated Oil Services

Erbil-based since 2008. A full spectrum of well services covering upstream oil & gas activity.

Xeed Energy Solutions

Surface well testing, early production facilities and carbon-footprint reduction technologies.

INNOVIUM

Innovium

Erbil engineering & project management — managed pressure, underbalanced and air drilling, pressure-control equipment.

LASS Industrial Investment

Authorized New Holland dealer in Iraq — machinery, irrigation systems, spare parts and local manufacturing.

From the well to the refinery, as one operation

Integrated Project Management

Single-point accountability for seamless multi-service projects.

Drilling & Workover

Reliable drilling and well repair with international-standard rigs and crews.

Directional Drilling

Navigating complex formations with precision and downhole control.

Managed Pressure & Underbalanced Drilling

Controlled formation-fluid flow for performance and safety.

Coiled Tubing Solutions

Well intervention for cleanouts, stimulation and logging.

Well Testing

Accurate performance evaluation — exploration, post-frac and HPHT.

Pressure Pumping & Stimulation

Advanced fracturing and acidizing to enhance well productivity.

Wireline Services

Open- and cased-hole logging, perforating and mechanical services.

Early Production Facilities

Supply and operation of EPFs to accelerate first production.

Oil & Gas Refinery Services

Operational, maintenance and technical support for oil and gas refineries.

Beyond the wellhead: supporting Iraq's refineries

HEWER extends its field-proven engineering, HSE and project-management capabilities downstream, helping oil and gas refineries run safely, reliably and at full capacity.

Maintenance & turnaround support

Planned and shutdown maintenance for process units, columns, tanks and piping.

Operations & technical support

Skilled crews and engineers supporting day-to-day refinery operations.

Equipment & spare parts supply

Certified process equipment, valves and spares from international partners.

HSE & quality assurance

The same ISO-certified systems and Zero Harm culture we apply in the field.

A capable, reliable, future-ready partner

Full-spectrum upstream services

From planning and drilling to production and optimization, every stage flows as one integrated operation.

ISO-certified systems

Quality, safety and environmental management woven into every procedure — ISO 9001, 14001 and 45001.

Rapid mobilization

When urgency strikes, field bases, yards and logistics hubs across Iraq turn plans into action fast.

Strong local presence

We know the regional terrain, regulations and conditions as if they were part of our own blueprint.

Experienced engineering teams

Deep domain expertise balancing precision with innovation on the most complex challenges.

Globally compliant standards

Every step mirrors international best practice and the expectations of IOC clients.

OUR PEOPLE

Crews who know the field

Our strength is a skilled local and expatriate workforce: rig crews, engineers and HSE professionals who have worked Iraq's fields for years and operate to international standards every shift.

Skilled local & expat workforce

Regional knowledge combined with international field experience.

Competency-validated teams

Every role is certified, trained and refreshed through our QMS.

Safety-first culture

Zero Harm is a daily practice on site, not a slogan.

Investing in careers

Clear growth paths, competitive benefits and rewarding, complex work.

Zero Harm culture, certified quality

ZERO HARM

HSE Excellence

- Robust HSE frameworks applied to every site and service line
- Risk management systems with proactive hazard identification
- Emergency response readiness and regular drills
- Environmental stewardship and emissions awareness
- Strong HSE reporting culture across all group companies

Quality Assurance

Our Quality Management System keeps reliability woven into every procedure, from tender to demobilization.

Standardized procedures

Competency validation

QA/QC checks at every stage

Equipment certification

Continuous improvement

Internationally accredited, locally aligned

ISO 9001:2015 Quality Management System

Cert. No. 25EQON12 • Registered 22 Jan 2025 • Valid to 21 Jan 2028

ISO 14001:2015 Environmental Management System

Cert. No. 25EEOT09 • Registered 21 Jan 2025 • Valid to 20 Jan 2028

ISO 45001:2018 Occupational Health & Safety

Cert. No. 25EOOU05 • Registered 20 Jan 2025 • Valid to 19 Jan 2028

ISO 9001 — Quality

ISO 14001 — Environment

ISO 45001 — Health & Safety

Regulatory alignment
Full alignment with the Ministry of Natural Resources (KRG) and the Ministry of Oil (Federal Iraq). Certified by AQC — EGAC-accredited, IAF MLA member.

All three certificates share one scope: integrated project management, drilling & workover, well testing, EPF supply and services, coiled tubing, pressure pumping & stimulation, wireline, MPD and UBD.

Certificate validity can be verified at aqcworld.com

Ready to mobilize anywhere in Iraq, 24/7

Erbil office

Corporate office and operations facility in the Kurdistan Region — home to IOS since 2008.

Baghdad office

Al Mansour district headquarters serving Federal Iraq operators and ministries.

Field bases

Forward operating bases co-located with client fields for immediate crew and rig support.

Workshops & storage yards

Equipment maintenance, inspection and certification under controlled conditions.

Logistics hubs

Regional hubs that move rigs, tools and people quickly and safely.

24/7 operational support

Round-the-clock engineering, HSE and supply-chain support for every active project.

Optimum Drilling Services

Global expertise, strong regional presence

Optimum is an independent oilfield services company operating across the Middle East and North Africa, delivering drilling, workover, completion, testing, surface-facility and project-management services. Established in the British Virgin Islands, Optimum serves international oil companies through its offices in Iraq, the UAE and the UK.

Integrated Oil Services (IOS)

Erbil-based well services since 2008

IOS was established in 2008 in the Kurdistan Region with its corporate office and operations facility in Erbil. It offers a wide spectrum of well services covering all aspects of upstream oil & gas activities, and maintains strategic alliances with world-class service providers to ensure continuous technical support, advanced technologies and world-class service quality.

Drilling support & field maintenance

Erbil HQ since 2008

World-class alliances

HSE & quality focused

CORE SERVICES

Drilling Support Operations

Production Optimization

Well Intervention Assistance

Field Maintenance

Oilfield Equipment Supply

CAPABILITIES & STRENGTHS

Established regional footprint

Quality-controlled operations

Trained, certified technical staff

Long-standing client support systems

Safety of people, assets and environment

Xeed Energy Solutions

Technology-driven, sustainable production

Xeed Energy Solutions is a recently established energy services company specializing in innovative solutions for the oil and gas sector. It focuses on surface well testing, early production facilities and carbon-footprint reduction, with an approach built on modern technologies, sustainable practices and operational excellence.

Well testing & sustainable production

Strong Kurdistan presence

Technology-driven engineering

Emissions-reduction focus

100+ active global contracts

CORE SERVICES

Well Testing (exploration, post-frac, HPHT)

Early Production Facilities

Produced Water & Solids Handling

Gas Processing & Multiphase Pumping

Flare Recovery, Geothermal & CO₂ Solutions

CAPABILITIES & STRENGTHS

Digital tools & AI integration

Strong customer support model

In-house engineering & simulations

Safety & emissions-reduction focus

INNOVIUM

Innovium

Any pressure, any fluid, any well

Innovium is an engineering and project management company based in Erbil. It plans, equips and supervises pressure-controlled drilling operations across Iraq and the Kurdistan Region — managed pressure, underbalanced and air drilling — and provides the pressure-control equipment those operations run on through international partners Frontier International, Hurricane Air Drilling and Sayatva.

Pressure-controlled drilling & engineering

Erbil-based, Iraq-wide

Engineer-led job planning

3 international partners

End-of-well data reporting

CORE SERVICES

Managed Pressure Drilling

Underbalanced Drilling

Air, Mist, Foam & Nitrogen Drilling

Engineering & Project Management

Pressure-Control Equipment Supply & Rental

CAPABILITIES & STRENGTHS

Single contract for engineering, equipment, crews and spares

Hydraulics & well-control modelling before mobilization

Kicks and losses corrected in seconds, not minutes

High-pressure valves, chokes, manifolds & ESD packages

Makes narrow-margin and depleted wells drillable

LASS Industrial Investment

Industrial investment beyond the wellhead

LASS Industrial Investment Company is the group's industrial and agricultural arm and the authorized New Holland dealer in Iraq. From offices in Baghdad and Erbil it supplies tractors, harvesters and Dejlah irrigation systems, genuine spare parts and after-sales support, and invests in local manufacturing — diversifying HEWER's footprint across Iraq's productive economy.

Machinery, irrigation & local manufacturing

-  Authorized New Holland dealer
-  Baghdad & Erbil offices
-  Serving Iraq's agriculture
-  Local manufacturing

CORE SERVICES

-  New Holland Tractors & Harvesters
-  Dejlal Pivot Irrigation Systems
-  Genuine Spare Parts & After-Sales
-  Local Manufacturing
-  Industrial Investment Projects

CAPABILITIES & STRENGTHS

-  Authorized dealership with genuine OEM parts
-  Nationwide sales and service coverage
-  Trained technicians and field support
-  Bilingual Arabic/Kurdish customer service
-  Diversifies the group beyond oil & gas

Growing Iraq's energy sector responsibly

HEWER integrates best practice and modern technology to raise resource efficiency in every operation — reducing our environmental footprint year on year while opening new lines of business for the energy transition.

Flare recovery

Capturing associated gas that would otherwise be flared and returning it to productive use.

Emissions reduction

Investing in technologies that cut emissions and waste across our own and our clients' sites.

Renewable energy

Managing and expanding wind and solar projects to generate clean electricity.

Water & solids handling

Responsible treatment of produced water and drilling solids.

“From the well to the refinery, we’ve got you covered.”

Let's build the next project together

Our team is ready to discuss your drilling, testing and production needs — and to deliver excellence in the field.
